

PRE-MONSOON RAINS PREDICTED IN SINDH

- Pakistan Meteorological Department has informed that moist currents from Bay of Bengal and Arabian Sea are penetrating upper and central parts of the country and a westerly wave is also likely to approach upper parts on 20th June. Under the influence of this weather system.
- Dust storm / rain-wind / thundershower is expected in Sukkur, Larkano, Dadu, and Jacobabad from 22nd to 24th June.
- Windstorm / dust-thunderstorm / lightning may damage loose structures like electric poles, trees, vehicles, and solar panels in upper / central parts of the country.
- Very hot weather conditions are likely to subside gradually during the forecast period.
- Farmers are advised to manage their crop activities keeping in view the weather conditions.
- General Public, Travelers, and Tourists are advised to take precautionary measures during the weather activity.
- Start Network (READY Pakistan) and its partner organizations are actively responding to the ongoing heatwaves across various districts of Sindh, including Jacobabad, through Heatwave Anticipatory Action initiatives. These efforts include preparedness support by establishing heat stabilization centers at DHQ Jacobabad, THQ Garhi Khairo and RHC Mirpur Burriro. The response also involves the capacity building of 100 health-care providers, frontline workers, and paramedics on heatstroke case management. Additionally, over 200 volunteers have been trained on climate change, the impacts of heatwaves, community-level preventive measures, and first aid for heatstroke. Public awareness has been further enhanced through the publication and distribution of IEC materials, along with awareness campaigns and early warnings disseminated via social media and other communication platforms.
- 15 Humanitarian Partners conducted awareness sessions on heatwave impacts, distributed Information, Education & Communication (IECC) material, displayed Banners and awareness raising through print, electronic, social and local media-content approved by PDMA
