

MONSOON RAINS PREDICTED IN THE COUNTRY

- Pakistan Meteorological Department has informed that moist currents are penetrating upper and central parts of the country and likely to become intensified in next couple of days. A westerly wave is expected to approach upper parts on 25th June and likely to become significant on 26th June
- Rain wind/thundershower is expected in upper and southeast Sindh (Sukkur, Larkano, Jacobabad, Khairpur, Kashmore, Hyderabad, Tharparkar, Mirpurkhas, Sanghar, Jamshoro , Tando Allahyar, Tando Muhammad Khan, Thatta, Badin and Karachi) from 25th to 28th June with occasional gaps.
- Heavy Downpour may cause urban flood in low lying areas of Hyderabad and Karachi during 26th to 28th June.
- Heavy downpour/windstorm and lightning may affect daily routines, and may damage weak structures like roof/wall of Kacha houses, electric poles, bill boards, vehicles and solar panels etc during the forecast period
- Start Network (READY Pakistan) and its partner organizations are actively responding to the ongoing heatwaves across various districts of Sindh, including Jacobabad, through Heatwave Anticipatory Action initiatives. These efforts include preparedness support by establishing heat stabilization centers at DHQ Jacobabad, THQ Garhi Khairo and RHC Mirpur Burriro. The response also involves the capacity building of 100 health-care providers, frontline workers, and paramedics on heatstroke case management. Additionally, over 200 volunteers have been trained on climate change, the impacts of heatwaves, community-level preventive measures, and first aid for heatstroke. Public awareness has been further enhanced through the publication and distribution of IEC materials, along with awareness campaigns and early warnings disseminated via social media and other communication platforms.
- 15 Humanitarian Partners conducted awareness sessions on heatwave impacts, distributed Information, Education & Communication (IECC) material, displayed Banners and awareness raising through print, electronic, social and local media-content approved by PDMA
