requirement of PDMA Sindh. The firm has given affidavit that it is neither blacklisted nor involved in any litigation. The on spot inspection of the sample was carried out by the technical team of Pakistan Maritime Security Agency and it was observed the samples of boats produced for inspection were flat bottom fiber glass, light in weight. The same can accommodate 8 to 10 men and 20 to 25 men respectively and can operate in shallow waters. Besides the Yamaha engines of 30HP and 48 HP offered by the firm are commonly used in Pakistan and their spares support is also available locally. According to the report the firm has past experience of manufacturing and providing similar types of boats for relief operations as they have complete setup in Karachi for manufacturing and maintaining such kind of boats including mobile repair team with all facilities to cater for the defect on site, the team further observed that (1) already fitted engines' seating plate (aluminum) thickness is less which is required to be increased (2) rubber line around the boat needs to be strengthen with stainless steel screws or appropriate and (3) the technical team of PDMA is required to get training to maintain boats and engines during and after operations by the firm for 10 to 12 years.
